A Chemical Hygiene System to Cleanse Beverage Lines

- High performance product specifically designed to remove microbiological build up of bio films and beer stone.
- Chlorine free this product contains no chlorinated derivatives, No risk of taste taints in dispensed product
- Suitable for all beverage line types
- 100% soluble in water, easily rinses out of the beverage lines, biodegradable
- Works in all water conditions
- Highly effective at low concentrations
- Over dosing will not damage the beverage lines
- Independently Evaluated by the BRi Brewing Research International

PYTHON CARE, specifically designed to remove microbiological build-up of bio films and beer stone ensuring it is suitable for all types of beverage lines and leaves no taste influences in the cleaned lines.

PYTHON CARE can be used in different dilution percentages to reflect the cleanliness of the beverage lines. This is to enable the beverage lines to be cleaned back to the original polymer and then maintain this level of cleanliness using a low dilution level of our line cleaner.

“TAKE PRIDE DISPENSING YOUR BEER, USE PYTHON CARE”
